HİDROPOLİTİK AKADEMİ

Hydropolitics Academy

THE ACADEMY

It is based in Ankara-Türkiye The academy aims to focus on Hydropolitics and relavent issues (Energy, Food, Environmental Security) in close cooperation and collaborations with some universities' and institutions.

The Hydropolitics Academy is committed to helping peaceful and sustainable water management at the local, regional and international level.

The Academy is an independent, non profit, non governmental and civil society initiative.

GOALS AND OBJECTIVES

The academy will provide advisory services with intergovernmental bodies, research institutions, academia and governmental organizations.

The academy will generate multidisciplinary research on hydrostability, sustainable water management projects and most suitable and applicable solutions for a **"New Hydro-Diplomacy Concept"** in the 21st Century.

We are aiming to be a reliable and dependable source of information and a bridge between civil society and decision makers being a non profit scientific organization.

MAIN SUBJECTS

The academy will focus on investigating existing

- Coordination
- Cooperation
- Collaboration

projects in transboundary river basins. **"A new Hydro-Diplomacy"** from water cooperation to comprehensive collaboration will be studied in some particilar river basins throughout the world.

The Hydropolitics Academy also maintains information networks and forges linkages that allow world partners to benefit equally from a global sharing of knowledge.

We need vision before action
